**CLEAN kWAT**

**Integrating Environmental Considerations into Energy Systems Development**

**Cooperation and Innovation for Good Practices**

Funded by the Erasmus+ Program of the European Union. However, European Commission and Turkish National Agency cannot be held responsible for any use which may be made of the information contained therein.

The Book on „Integrating Environmental Considerations into Energy Systems Development“ is here.

The Book chapters are:

1. Energy, environment and ecosystem relations
2. Ecological Footprint for energy systems
3. Conventional energy production systems and environmental impacts:  
Thermal Power Plants
4. Ecological and environmental dimensions of nuclear power plants
5. Solar energy systems and environmental effects
6. Wind energy
7. Wave, tidal and hydrogen energy
8. Geothermal energy
9. Hydropower energy
10. Biomass energy systems

All of our project results are now available in all partner languages: English, German, Spanish, Hungarian, Serbian and Turkish.

The **Booklet** will help you with understanding educational needs for VET professions in the energy supply sector. It provides Learning pathway, LP structure and competences acquired for selected professions.

The **video** documentaries based on the book chapters are ready.
