

Co-funded by the Erasmus+ Programme of the European Union

SES\_ECO Social Ecological System Approach for Improving Ecological Literacy of Youth Project: 2019-1-TR01-KA205-067388

**Adusu Dissemination Activities** 

During this first period the Project was presented both through targeted meetings with public office managers (Municipality and University), meetings addressed to Adusu members and volunteers, university students and city scout groups, and through the dissemination of an Adusu newsletter.

## **SES-ECO** Questionnaire

The first dissemination activity concerned the presentation and distribution of the initial questionnaire to a group of over 30 young people from the University of Padua and Scout Groups of the city.

### **Adusu Assembly**

The SES-ECO Project was presented at the Adusu Annual Assembly (26.02.2020) to the members and volunteers of the Association (10 participants).

#### Adusu Newsletter

The Project was presented in Adusu's newsletter to over 200 contacts of people who have participated in previous initiatives of the Association, including teachers and high school managers, university teachers and students, professionals and local administrators.

La newsletter è dedicata o presentare il Progetto "Social Ecologiacal System Approach" per accrescere l'afabetizzazione ecologica dei giovani di cui Adusu è partner per l'Italia.

Il Progetto rientra nel Programma Erasmus+ ed è stato avviato a giugno 2019 e si concluderà a maggio 2021.

#### Informambiente e UniPadova Sostenibile

The Project was then presented to the managers and related staff of the Informambiente Office of the Municipality of Padua, which promotes training courses for teachers and students of schools of all levels of the city of Padua and the UniPadova Sostenibile Project, the special project of the University of Padua dedicated to the promotion of sustainability both in the study paths and in the organization of the University itself.

These are two realities with which Adusu has been collaborating for a long time and which can make an important contribution to the forthcoming dissemination activities of the products and results of the SES-ECO project.

# **Adusu Maps Project**

During the COVID 19 pandemia the Project was introduced to a group of 20 students from the University of Padua participating in the MAPS project promoted by Adusu to raise awareness and promote knowledge of the Sustainable Development Objectives of the UN Agenda 2030. The meeting was organized as online.
