SES\_ECO

Social Ecological System Approach  
for Improving Ecological Literacy of Youth  
Project: 2019-1-TR01-KA205-067388

**SOKO Dissemination Activities**

During this first period we presented the concept of the SES-project to the ca. 50 students of the vocational school course of the DAA-Technikum in Bielefeld and discussed it in detail. Since the students are already working as technicians in various branches, which also include environmental and nature conservation issues, we are confident that the SES concept presented will have an impact on their professional practice.

In addition, we had planned a public event with vocational school teachers and university lecturers, but due to the Covid 19 pandemic, this event could not take place or has to be postponed to an still undetermined date.

Furthermore we have contacted some schools in Bielefeld, which promotes training courses for teachers and students of schools of different levels. We have prepared an online conference with some of our contacts will be held in July, at which we will also present the SES project.

Finally, a SOKO newsletter was prepared, which will be posted or distributed in the coming weeks at the University of Bielefeld and some other selected institutions.

### **SES-ECO Questionnaire**

The first dissemination activity concerned the presentation and distribution of the initial questionnaire to a group of over 30 young people from the University of Bielefeld and Scout Groups of the city.
